---

## SUMMARY

Creative Frontend Developer with 4 years of experience in designing and implementing user-centric web interfaces. Skilled in translating design concepts into engaging, responsive web applications using frameworks such as React, Angular, and Vue.js. Additionally, I have 1 year of hands-on experience in Node.js development, enabling me to build and integrate robust backend solutions. Passionate about enhancing user experience through intuitive design and seamless functionality, I excel at collaborating with UX/UI designers and backend developers to deliver aesthetically pleasing, comprehensive digital solutions.

## PROFESSIONAL EXPERIENCE

**TOMOSIA - Web Developer**                                                    **Feb 2022 - Present**

- **Cross-Functional Collaboration:** Worked closely with design and backend teams to develop high-quality products that precisely meet customer requirements.
- **User Experience Leadership:** Led the user experience aspects of software development, resulting in increased user satisfaction across five projects.
- **Full-Stack Development:** Developed dynamic web applications using ReactJS and VueJS, and built robust backend functionalities with Node.js by designing and implementing RESTful APIs.
- **Agile Project Delivery:** Contributed to the on-time delivery of all projects in an Agile environment, consistently meeting or exceeding quality standards.
- **Quality Assurance Collaboration:** Partnered with QA teams to swiftly resolve over 1,000 issues, significantly enhancing product stability and user satisfaction.

**Antek - Fontend Developer**                                                    **Dec 2021 - Feb 2022**

- **Frontend Development & Maintenance:** Developed, and maintained two highly interactive web applications using ReactJS, increasing user engagement compared to previous versions.
- **Performance Optimization:** Optimized applications to improve performance by 40% and reduce load times by 50%, significantly enhancing the overall user experience.
- **Cross-Functional Collaboration:** Worked closely with design and backend teams to deliver high-quality products that precisely meet customer requirements.
- **Requirements Analysis:** Collected and defined customer requirements to create clear, actionable specifications for project planning.

**Ditagis - Frontend Developer**                                                    **Nov 2020 - Dec 2021**

- **Full-Stack Development:** Developed, and maintained five highly interactive web applications using ReactJS and Angular, significantly increasing user engagement compared to previous versions.
- **Backend Engineering:** Independently developed robust backend functionalities with Node.js, designing and integrating RESTful APIs to streamline data flow and enhance overall performance.
- **Cross-Functional Collaboration:** Worked closely with design and backend teams to deliver high-quality products that precisely meet customer requirements.
- **Quality Assurance Partnership:** Partnered with QA teams to swiftly and accurately resolve over 300 issues, significantly improving product stability and user satisfaction.

## TECHNICAL SKILLS

HTML, CSS, JS, Typescript

ReactJS, NextJS

VueJS, Angular

NodeJs

## SOFT SKILLS

Teamwork

Research

AI-Driven Innovation

## EDUCATION

Bachelor of information technology                                    Sep 2017 - Sep 2021
Duy Tan University
